

DIGITAL COPY REDEMPTION PROTOTYPE

Conversion from physical to digital is a common activity for consumers who interact with Disney Movies Anywhere. Currently redeeming a digital copy of a physical title involves a unique code that is entered manually by the consumer. This project aims to use various technologies and tools so that the physical disc can directly be used to redeem a digital copy.

Participants

Product Owner:	Charles Harless
Stakeholders:	Disney Movies Anywhere, Digital Copy Plus

Status

In Review

Business Goals

- Identify and recommend methods for digital copy redemption via the physical disc
- Demonstrate an implementation that is significantly easier to use than currently deployed methods

Constraints

- *Completion Date:* 10/10/2014
- *Resources:* development by internal; creative by internal
- *Budget:* development costs not to exceed 30K; creative costs not to exceed 5K

Deliverables

- Summary and analysis of communication and proof of ownership methods for digital copy redemption via a physical disc
- Working prototype on a Blu-ray disc that demonstrates digital copy redemption using one chosen method on a standard blu-ray player
- Usability comparison of working prototype to currently deployed methods

Success Criteria

- Identified at least 3 methods for using the physical disc for digital copy redemption
- Identify at least 1 proof of ownership method using PMSN and 1 method not using PMSN
- Informal usability testing with at least 3 individuals
